Profile

I'm a curious web developer who enjoys building clean, responsive, user-focused web experiences; at work I build WordPress sites with PHP and JavaScript. I have also worked full stack with React (Next.js), Node.js, Express and MongoDB, and I like exploring how AI tools can make real products better.

Experience

Jan 2022 – today
Full-time
Hüttenberg,
Germany

Web Developer · Taquiri GmbH & Co. KG

I build WordPress websites for businesses and organisations, from custom themes in PHP to plugins and the front end. Clients come from many sectors: hotels and travel agencies, law firms and finance, TV, media and film production, healthcare and care services, air cargo and logistics, furniture retail, trades and construction, foundations and associations.

- Custom WordPress themes in PHP
- Plugins and user interfaces with HTML, CSS, Bootstrap and JavaScript
- Multilingual sites with WPML, content structures with Advanced Custom Fields (ACF)

PHP, WordPress, JavaScript, CSS, HTML, Bootstrap, WPML, ACF

Aug 2021 –
Jan 2022
Frankfurt, Germany

Front-end Developer · Self-employed

Built the website of a company that sells industrial supplies, with React and Next.js, SCSS and Node.js.

React, Next.js, SCSS, Node.js

Jun 2021 –
Jul 2021
Hüttenberg,
Germany

Web Developer (internship) · Taquiri GmbH & Co. KG

Updated content on WordPress sites, changed and built site features in PHP and JavaScript, and improved an existing WordPress plugin.

WordPress, PHP, JavaScript

Projects

Released

Findling · a fast, private file launcher for macOS;
free and open source (github.com/mehambas/findling)

In development

Brimlet · lives in the MacBook notch, with music, a timer and your next meeting

In development

Paravent · hides the menu bar icons you don't need behind a divider

In development

Stowia · a clipboard history that stays on your Mac
